McCAULEY
TRAILERS

Product Range

MAC Drawbar Trailers are manufactured to suit the specific needs of the customer whilst ensuring the most efficient and economic mode of transportation available. Individual requirements are reviewed in-house and a range of options such as ramp combinations and tying points ensure the trailer supplied meets the requirements of the customer.

All MAC trailers are built with brand new parts and meet all EU and exporting regulations.

2 Axle Drawbar Low Loaders

MAC 2 Axle Low Loaders are available on air suspension with a carrying capacity of 19 tonnes gross. MAC Drawbar Low Loaders are designed to suit individual requirements and are widely used by construction companies, roads servicing and utility contractors to transport plant and machinery such as excavators, pavers, planers and tar spreading equipment.

3 Axle Drawbar Low Loaders

The MAC 3 Axle Low Loader is manufactured with a carrying capacity of 25 tonnes gross. Like the 2 Axle Low Loaders, these trailers are used for the transportation of cumbersome plant and machinery.

5.5T Machinery Carriers

The MAC Drawbar Machinery Carrier has a carrying capacity of 5.5 tonnes gross, making it ideal for transporting most types of mini digger without the need for large machinery. The Machinery Carrier is a compact trailer and comes equipped with ABS and air brakes meeting all laws for transporting equipment over 3.5 tonnes.

2 Axle Drawbar Platform Trailers

(Available with container locks)

MAC 2 Axle Drawbar Platform Trailers are available on either single or twin wheels with carrying capacities of 10 tonnes and 17 tonnes gross. These trailers are widely used by the waste, construction and transportation industries to transport materials and equipment. MAC Drawbar Platform Trailers come with options such as twist locks to suit a standard ISO 20ft container, a telescopic drawbar, demountable headboard and pull out extension ensuring this trailer can be used for multiple applications.

3 Axle Drawbar Platform Trailers

(Available with container locks)

The MAC 3 Axle Drawbar Platform has a carrying capacity of 25 tonnes gross. Like the 2 Axle Drawbar Platform, these trailers are used to transport materials and equipment. Again a number of options are available so that the trailer can be maximised for use in various roles.

2 Axle Brick & Block Carriers

Like the name suggest, the MAC Brick & Block Carrier is manufactured for the movement of heavy materials within the construction industry. The 2 Axle Brick & Block Carrier is manufactured using the highest quality materials and has a carrying capacity of 19 tonnes gross.

3 Axle Brick & Block Carriers

The MAC 3 Axle Brick & Block Carrier has a carrying capacity of 25 tonnes gross. Like the 2 Axle Block Carrier, this trailer has been developed to meet the specific needs of customers operating within the construction industry and is widely used for the movement of heavy materials from site to site.

Export Trailers

MAC Trailers have developed a range of commercial Turntable Trailers specifically for the European market. Available in 2, 3 and 4 axle configurations, these come in both Flatbed and Low Loader variations and range in carrying capacities from 18 tonnes to 44 tonnes gross.

Custom Builds

The extensive range of Drawbar Trailers we have is just part of what we offer our customers. With our in-house design team we specialise in the customisation of trailers to suit individual requirements and work closely with our customers to supply the exact trailer required. We can either add features to existing models to suit the operators industry or design a trailer from new.
