TRAILERS

Product Range

MAC Drawbar Skip Trailers have been designed specifically for the recycling and waste handling industries. These trailers come in 2 and 3 axle configurations and are suitable for either roll-on roll-off skips or bin skips.

As with all MAC products, these trailers are a combination of years of experience and are engineered to meet the demanding needs of today's waste handling industry. As a result, MAC Skip Trailers come with a number of options to suit the personal requirements of the customer.

All MAC trailers are built with brand new parts and meet all EU and exporting regulations.

2 Axle Ro/Ro Skip Trailers

MAC 2 Axle Roll-on / Roll-off Skip Trailers have a carrying capacity of 19 tonnes gross and are available on air suspension. Used in conjunction with roll-on / roll-off Lorries, this trailer has the capability to double operating loads by adding an additional skip. With standard features such as front and rear loading guides, air locks and telescopic drawbar, the MAC Ro/Ro Skip Trailer allows the user to get maximum usage from the trailer.

3 Axle Ro/Ro Skip Trailers

The MAC 3 Axle Roll-on / Roll-off Skip Trailer has a carrying capacity of 25 tonnes gross. Like the 2 axle trailer, it is used in conjunction with roll-on / roll-off Lorries. With standard features such as front and rear loading guides, air locks and telescopic drawbar, the MAC Ro/Ro Skip Trailer allows the user to get maximum usage from the trailer.

Ro/Ro Skeletal Trailers

MAC Roll-on / Roll-off Skeletal Skip Trailers are available in 2 or 3 axle configurations and have carrying capacities of 19 tonnes gross and 25 tonnes gross respectively. With standard features such as front and rear loading guides, air locks and telescopic drawbar, the MAC Skeletal Trailer allows the user to get maximum usage from the trailer.

Swan Neck Skip Trailers

Designed for standard chain bin skips this small but practical trailer is durable, strong and simple to use. Designed to meet the requirements of the operator the trailer has simple securing points and a swan neck drawbar so that it is suitable for a wide variety of truck and skip models.
