MAC Hooklift Trailer Options

Model: JI-20000

Version C

L	LT	H	R	B	α
5500	6200	1550	1250	270	50°

LT= Total length of the equipment before assembly.

L= Distance from the front of the turret to the centre of the tilting roller.

H= Height of the hook of the equipment (it must be equal to the height of the skip connection).

R = Trajectory of the turret movement cylinders.

B= Height from the base of the equipment to the skip or dumpster supports.

a = Maximum tilting angle.
